

## **Welcome!**

Thank you for your willingness to participate in the evaluation of Orlando Tropical Transport's new web site. Orlando Tropical Transport is a livery/taxi company that serves central Florida and provides a variety of services. Our goal is to see how easy or difficult the web site is for visitors to use. At the end of testing there will be a short questionnaire for feedback.

## **Your role:**

As a tester, your role is to "poke around" the website; testing links, maps and forms. Inspect the layout and design, the fonts, colors and images. Try to get a sense of who this site is for, how the site "works", and what you like or don't like about it.

## **Things to keep in mind:**

- The site is not in complete working order.  
The **Home, Destinations, and Reservations** pages are the only functional pages on the site. The others are currently under construction and should not be evaluated during this testing session.
- All feedback provided would be used to improve the site for future visitors.

## **Test Objectives:**

1. In a web browser, open the [Orlando Tropical Transport](http://brandanmajeske.github.com/wsp_ott/index.html) web site.
2. Test links on the Home, Destinations and Reservations pages.
3. Review the text on the pages. Can you locate any spelling mistakes or other types of errors?
4. The Destinations page contains a map of popular sites in Florida – test the map.
5. The Reservations page has a form – test the form (note: the form is not live and will not be submitted).

After you have completed testing the site, please fill out the short questionnaire located at [here](http://brandan.us/).
